

## ABSTRACT

A compound having the general formula (I):

5

wherein  $\text{R}_1$  is a hydrocarbon radical comprising  $\text{C}_1$  to  $\text{C}_{10}$  main chain carbon atoms, wherein hydrogen atoms bonded to the main chain carbon atoms are optionally substituted;  $\text{R}_2$  is a hydrocarbon radical comprising 6 to 20 main chain carbon atoms, wherein hydrogen atoms bonded to the main chain carbon atoms are optionally substituted;  $\text{V}_1$  is a saturated or unsaturated, monocyclic or bicyclic ring system comprising 5 to 9 ring atoms, wherein at least 2 ring atoms are nitrogen atoms forming the same cyclic moiety; and  $\text{V}_2$  is a moiety comprising a carboxyl group and an  
10  
15 unsaturated carbon-carbon bond.
